

# Individual Version

*eDocsOnline* provides an affordable personal storage space on the Internet. Now it is easy to store, share, protect, and access your information whether you are at home, in the office or in an Internet café. *eDocsOnline* gives you security, advanced features to manage your data, and 24/7 support.

- ✓ **Access**  
*eDocsOnline* lets you access your information easily whenever and wherever you need it most. Enjoy the freedom of making your documents available without carrying a laptop. For example, keep your résumé current and accessible, maintain multiple versions of it and quickly e-mail someone a copy from any PC whenever opportunity knocks. Whether you are at home, in the office or on the road you always have instantaneous 24/7 access.
  
- ✓ **Store**  
*eDocsOnline* provides you with storage place on the Internet where you can securely store a variety of information: picture files (family photos, JPEG's, GIF's, Bitmaps, TIFF's), music files (MP3's, MP4's, WAV's), video files (MPEG's, DVD's, Real Player), etc. Add your personal notes and remarks to a document (descriptive name field). Use *eDocsOnline* as a secure repository for sensitive documents (passport, driver's license, insurance papers, air tickets) for safekeeping while you are at home or travelling abroad. Organize your private space in the way you like and have the information always at hand.
  
- ✓ **Share**  
Once your files and documents are stored in *eDocsOnline*, it is very easy to share them with friends and family. Send a secure link to a friend with the vacation photos, latest music hits or favorite home recipes, and eliminate the hassle of large e-mail attachments and clunky, hard to use FTP servers. Your friend does NOT need to open an account or pay any fee to access the shared files. She/he receives the link in the e-mail box and can view a document, open or download the attached files. Moreover, your friend can leave notes and remarks. Use it to get a feedback about sent recipe; or find out what pizza has to be served at a forthcoming party.
  
- ✓ **Protect**  
*eDocsOnline* guards your data and saves your life's work: all your files and documents are always available as an off-site backup. Even when your computer is in a disaster mode, all your data is securely stored online and is accessible anytime from any Internet-connected device. Built-in 128-bit SSL scrambles your data and lets you store any sensitive files and documents without hesitation; while, regular virus scanning assures that your documents and files are virus-free.
  
- ✓ **Search**  
*eDocsOnline* not only stores and organizes you information, but retrieves it in a convenient way. Three embedded searches help you find a document quickly and easily. Preset search automatically retrieves recently created or modified documents. Quick search retrieves documents and files by keywords while Advanced search looks for a document by specific criteria. Moreover, the powerful indexing and full text search engine allows you to search the contents of your favorite file types including Microsoft Office (Word, Excel), Adobe Reader and more. This sophisticated feature is built into the *eDocsOnline* application and is provided for free with a subscription.
  
- ✓ **Modify**  
*eDocsOnline* provides an automatic version control of your files and documents. It eliminates common version frustrations and prevents documents from being overwritten or deleted as documents are modified. Files can be quickly rolled back to previous versions when required. All versions are maintained. You can easily view any version or download it to your desktop.

You can see that the possibilities for using *eDocsOnline* are almost endless. Here we want to describe only three of the numerous examples.

#### Case # 1

Imagine that you are a technical writer in Australia and you write copy or edit rewrites for clients who are in Canada. You have to exchange large blocks of information by e-mail. *eDocsOnline* allows you to make your job more effective. You save time because now your clients are able to see your work - securely.

#### Case # 2

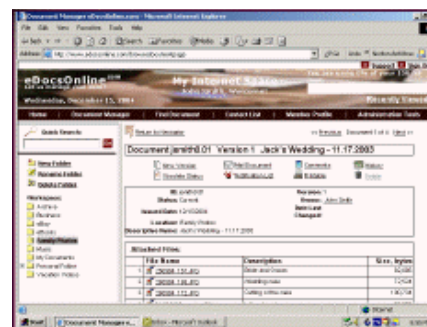

Imagine that you are looking for a new job. After two weeks of extensive searching you are overwhelmed with different versions of your resume. Moreover, you repeatedly send a resume for the same position. *eDocsOnline* allows you to keep different versions of your resume and to send them from anywhere. You can also keep notes for when and to what position the resume has been sent. All these notes are searchable and you can quickly check information about a particular position or company.

#### Case # 3

Imagine that you are a web designer. Version control and backup are the keystones of your success. *eDocsOnline* effects automatic versioning of your files and maintains an offsite backup of your source code. Moreover, your data is readily available wherever you happen to be.

*eDocsOnline* is a powerful storage, access and collaboration tool on the web. You can review your files at home, from the office or on the road; collaborate online with friends; backup and archive files and documents through a self-intuitive, self-explainable interface.

To learn more about *eDocsOnline* visit the demo corner of our web site. *eDocsOnline* also offers a 15-day free trial of the fully functional version with no obligation. For further questions, please contact us at [support@edocsonline.com](mailto:support@edocsonline.com).
